Let's play

The sweat Ice Cream Cart inspires the most popular make-believe play of all: Trading and playing shop. The richness of themed and tactile, moving play elements support dramatic play and conversations. They spur cooperation, thus paving the way for social understanding and friendships. When children explore the functionality of for instance the rubber flaps and

put items through the holes in the desk, or when they run the flowers in the grooves of the flower bush, it is not solely great explorative play. It also trains children's understanding of cause-and -effect, their understanding of object permanence and their logical thinking skills. The dramatic play scenarios, playing ice cart, trains communication and language skills.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
