This fun, sturdy Triple Mega Deck will attract toddlers over and over. It invites to explore the various auditive and tactile play panels, stimulating logical thinking and creativity in the child. The drums create variation in sound and can be played alone or together, inviting for social interaction. The tunnel support climbing, crawling and cross-coordination. This

stimulates cross-modal perception, important e.g. for reading. The bubble window in the tunnel bridge distorts voices when spoken into, evoking a sense of wonder and training logical thinking. From the roomy platforms a curly climber invites for a thrilling rotating ride back to ground level. There is a double slide also, which allows for carers to join in. The house

platforms offer appealing tactile details to explore, training logical thinking. So this is fun play and training of life skills.
