This fantastic play tower will inspire young children to play actively, using their muscles to climb to the top and slide to the ground, again and again. The net climber provides an age-appropriate challenge to help develop cross-coordination skills. Strengthening cross-coordination skills enhances children's abilities to use both sides of their brain. This cross-

modal perception enables reading. The playhouse also offers a space for social play. The windows encourage children to seek out their friends from on top of the tower. The sturdy desk on the side of the structure is an additional place for meetings. Sliding supports posture and balance, important skills for young children as they grow, and great fun for active

physical play.

## Theme

**Cognitive:** suggests a theme and supports dramatic play, which stimulates language and communication skills.

## Desk

**Social-Emotional:** fine meeting place and a space creator. Sharing and cooperation from both sides to create a social scenario that supports communication and cooperation.

## Slide

**Physical:** develops spatial awareness, sense of balance and trains core muscles when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** young children develop their understanding of space, speed and distances when sliding down.

## Window

**Social-Emotional:** invites interaction between sides and cooperative play.

## Climbing net

**Physical:** supports physical strength and cross-body coordination, which impacts coordination of the right and left part of brain.

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

Main posts with hot dip galvanized steel footing are available in different materials: Pressure impregnated pine wood posts. Pre-galvanized inside and outside with powder coated top finish steel posts. Lead free aluminum with color anodized top finish. Greenline TexMade posts of 95% post-consumer recycled PE and textile waste.

All decks are supported by unique designed low-carbon aluminum profiles with multiple attachment options. The grey colored molded decks are made of 75% post-consumer waste PP material with a non-skid pattern and texture surface.

The slides can be chosen in six different colors and three materials: Straight or curved one-piece molded PE slides, made from 33% recycled post-consumer materials in different colours. Combined EcoCore™ sides and stainless-steel. Full stainless steel in one piece design for more vandalism proof solutions.

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with the lowest possible CO2e emission factor such as EcoCore™ panels of 100% post consumer recycled ocean waste.
