

Barn

PCM51421

The Barn with its farm themed illustrations is a great attractor of dramatic and fun physical play for all younger children. The variety of manipulative and fun physical activities on elevated and ground level support dramatic play scenarios. Varied climb, crawl, sway and slide activities attract hugely and ensure physical activity that trains important motor

skills and major muscles. Inclined net and stair accesses make for a secure, yet fun climb up. This trains cross-coordination, which builds body confidence and ultimately stimulates the cross-modal perception. This supports for instance reading skills. The slide and double slide vary the choice of going down. And on ground level, around and under the platform, a

nice desk and hammock makes an attractive gathering point, supporting children's social-emotional skills. Dramatic play is the favorite play type for younger children. In the case of the Barn, storytelling themes of house, farm and production can be put to play, again and again.

Item no. PCM51421-0901	
General Product Information	
Dimensions LxWxH	477x411x338 cm
Age group	2+
Play capacity (users)	17
Colour options	 

Barn

PCM51421

Fireman's pole

Physical: coordination is supported when going down, as well as arm and core muscles. Landing strengthens bone density, which is built for life in early childhood. **Social-Emotional:** turn-taking and risk-taking. **Cognitive:** young children develop their understanding of space, speed and distances when gliding down fast.

Theme

Cognitive: suggests a theme and supports dramatic play, which stimulates language and communication skills.

Hammock

Physical: coordination and sense of balance when swaying. **Social-Emotional:** meeting, pushing friends gently back and forth, turn-taking. **Cognitive:** for toddlers cause and effect understanding.

Desk

Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

Double slide

Physical: sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** invites socializing, supports parent-child and peer-to-peer play. **Cognitive:** young children train their understanding of space, speed and distances when sliding down quickly.

Climbing net

Physical: supports physical strength and cross-body coordination, which impacts coordination of the right and left part of brain, fundamental for other skills such as the ability to read.

Tic-tac-toe panel

Social-Emotional: stimulates communication and turn-taking skills. **Cognitive:** support rules understanding, strategic thinking. **Creative:** leaving marks when tumblers are left in new positions.

PCM51421

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

Main posts with hot dip galvanised steel footing are pre-galvanised inside and outside with powder coated top finish.

All decks are supported by unique designed low-carbon aluminum profiles with multiple attachment options. The grey colored molded decks are made of 75% post-consumer waste PP material with a non-skid pattern and texture surface.

Item no. PCM51421-0901	
Installation Information	
Max. fall height	118 cm
Safety surfacing area	36.4 m²
Total installation time	20.9 hours
Excavation volume	0.99 m³
Concrete volume	0.12 m³
Footing depth (standard)	90 cm
Shipment weight	762 kg
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
EcoCore HDPE	Lifetime
Hollow PE parts	10 years
Post	10 years
PP Decks	10 years
Spare parts guaranteed	10 years

High-quality polycarbonate with a thickness of 15mm. The graphic prints are added by a unique multi-layer print process where the inner layer is the image and outer transparent layer functions as protection. Both PC panel and the water-based lacquer are UV stabilized to prevent fading.

The slides are available in either molded PE made from 33% recycled post-consumer materials in different colors or in full AISI304 stainless steel with a thickness of 2mm.

The stainless steel activities are made of high quality stainless steel. The steel is glass blasted after manufacturing to ensure a smooth gliding surface.

Sustainability Data

PCM51421

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
PCM51421-0901	1,576.98	2.63	55.41

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Play systems

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
