

# Baby Seat, H:2.5m

SW990023

Item no. SW990023-00	
<b>General Product Information</b>	
Dimensions LxWxH	63x37x0 cm
Age group	2 - 5
Play capacity (users)	1
Colour options	●

The sturdy baby seat of the Baby Seat Swing is an irresistible invitation for infants and their care givers. The swinging motion of the Baby Seat Swing will make infants want to go again and again. There are several benefits of the attraction: firstly, the swing seat supports the seated infant all around so that the feeling of security is guaranteed. Secondly, the rubber

seat is placed at a good height for the infant to be at eye level with older children. The swinging motion trains the child's motor skills, specifically the sense of balance and space. Seated while swinging also trains the core muscles. All of these physical skills are fundamental to the infants ability to walk and navigate the surroundings securely. The action

also stimulates the understanding of cause and effect and thinking skills. Socially, swinging and getting pushed in the swing seat by parents, care givers or siblings is great fun.

## Toddler swing seat

**Physical:** balance, coordination and spatial awareness are developed when swinging. These are necessary skills for judging distances and navigating. **Social-Emotional:** feeling of security from support. **Cognitive:** understanding of cause and effect.

The baby seat is a two component seat with a PP inner core and outside rubber, produced in one operation. The seat is available with swing chains of either hot dip galvanised steel or stainless steel.

Item no. SW990023-00	
Installation Information	
Max. fall height	241 cm
Safety surfacing area	28.4 m <sup>2</sup>
Total installation time	0.1
Excavation volume	0.00 m <sup>3</sup>
Concrete volume	0.00 m <sup>3</sup>
Footing depth (standard)	0 cm
Shipment weight	6 kg
Anchoring options	
Warranty Information	
Chains	10 years
Spare parts guaranteed	10 years
Swing seat	10 years

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
