The KOMPAN swing seat is specially designed for children. It has a curved shape with a non skid surface of thermoplastic elastomers (TPE) which is moulded on an insert of polypropylene (PP) plastic. The combination of these two types of plastic gives a high value seat with a soft, user friendly surface. The seat is attached to the swing by use of Y-chains.

Swing seat

Physical: balance, coordination and spatial awareness are developed when swinging. These are necessary skills for judging distances and navigating. The swinging movement trains the arm, leg and core muscles, and strengthens bone density when jumping off. **Cognitive:** cause and effect understanding and thinking skills for younger children when swinging.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
