Playhouse with Balcony

PCM003532

Item no.				
General Product Information				
Dimensions LxWxH	232x174x186 cm			
Age group	6m - 5			
Play capacity (users)	15			
Colour options				

This activity packed playhouse will attract and excite toddlers again and again. There are several features that greatly increase play value and toddlers' understanding of the world in this play unit: the scale of the house makes a perfect frame for looping the entrance and crawl-through hole, stimualting crosscoordination. The shop counter desk features a conveyor belt made of small spheres, providing a great tactile sensation and providing a stimulating cross-modal perception, important for reading skills. The peek-a-boo panel intrigue toddlers and their understanding of object permanence: that items may still exist even though out of sight.

Playhouse with Balcony

PCM003532

Window with curtains Physical: tactile stimulation supports sensory skills, when children explore characteristics of the materials. Social-Emotional: social interaction between inside and outside, supporting turn-taking and cooperation. Cognitive: understanding object permanence when playing, e.g. peek-a-boo. Dramatic play support, encouraging language skills. Creative: leaving a mark, deciding how to place curtains.

Crawl-through hole

Physical: the hole allows for climbing and crawling through, developing cross coordination, proprioception and spatial awareness. **Social-Emotional:** cooperation and turn-taking when passing one another.

Desk with conveyor belt

Physical: tactile stimulation from running hands over rolling spheres on conveyor belt. Social-Emotional: sharing and cooperation from both sides create a social scenario that supports communication and cooperation. Cognitive: supports dramatic play scenarios, trains cause and effect understanding.

Social-Émotional: the balcony invites meetings and interaction with people on ground level. **Cognitive:** invites dramatic play and performance, which stimulates language development.

Desk

Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
