

Dragite

COR47330

The responsive, bouncy ropes and nets of the Dragite is a popular attraction for children. The varied climbing and meeting options make them want to come back again and again. The transparency of the nets makes communication possible across the net. The symmetry of the net cubes supports climbing for younger or less confident climbers and variation for all. The

side ropes function as meeting and retraction spots in the climbing landscape and hanging from the arms train upper body muscles. This is important to children today as they lead increasingly sedentary lifestyles. Concentration is needed when climbing, as the ropes are interconnected and reflect the movements of all climbers, throughout the net. This trains the

muscles, cross-body coordination and spatial awareness, important for security in motion.

Item no. COR473301-0406

General Product Information

Dimensions LxWxH	437x437x436 cm
Age group	3+
Play capacity (users)	28
Colour options	

Height

Social-Emotional: children develop courage and self-regulation when being up high. This positively affects self-confidence.

Connected nets

Physical: the connected nets make the climbers feel the movements of the other climbers. All muscle groups are trained, as well as cross coordination. **Social-Emotional:** the climbers' movements affect the other climbers, so consideration and turn-taking is supported.

Transparency

Social-Emotional: the transparency makes cooperation and communication possible, which are essential life skills for children to learn.

Big meshes

Physical: the big meshes allow for climbing and crawling, supporting proprioception, cross coordination and spatial awareness. **Social-Emotional:** allow more children being seated together, sharing.

Designed to allow the typical function of rope play structures to move Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector. Our clamps are safe, durable and vandalism-proof.

The aluminium swages of the net are double conical with rounded ends and are as small as safety allows. The overall net design aims at keeping metal parts within the net to an absolute minimum, both in size and number, to provide the best possible rope climbing experience.

Corocord membranes consist of friction-proof rubberised material of conveyor belt quality with excellent UV resistance. Tested and compliant with REACH requirements for PAH. Embedded is a four-layered armouring made of woven polyester. The armouring and the two surface layers result in a total thickness of 7.5 mm.

Item no. COR473301-0406	
Installation Information	
Max. fall height	230 cm
Safety surfacing area	57.4 m²
Total installation time	15.1 hours
Excavation volume	1.76 m³
Concrete volume	1.00 m³
Footing depth (standard)	120 cm
Shipment weight	483 kg
Anchoring options	In-ground ✓
Warranty Information	
Corocord (Hercules) Rope	10 years
EcoCore HDPE	Lifetime
Galvanised Steel	Lifetime
S-Clamps	10 years
Spare Parts Guarantee	10 years

The steel struts are hot-dip galvanised inside and the outside finish is lead-free zinc. The galvanisation has excellent corrosion resistance in outdoor environments and requires low maintenance.

The COROCORD Frame Nets are available in 8 colour themes, ranging from elegant to expressive black or a natural neutral sand colour section to bright eye-catching signal colours which appeals to children of all ages.

Sustainability Data

COR47330

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
COR473301-0406	1,394.40	3.69	45.99

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025

Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO₂ calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
