

# Pony Seesaw

M190

Item no. M19001-01P

## General Product Information

|                       |   |
|-----------------------|---|
| Dimensions LxWxH      | 42x118x60 cm  |
| Age group             | 1+  |
| Play capacity (users) | 2   |
| Color options         |  |

The Pony Seesaw is a wow play event for young toddlers. Rocking on the Pony Seesaw is a thrilling physical and social activity for young children. There is even room in the middle, so that three, four or more children can play. Rocking is not only fun. It stimulates physical, social-emotional and cognitive skills. The seesaw responds to children's

movements, which helps to develop spatial awareness and a sense of balance. These are fundamental motor skills that help the child move confidently and for instance sit still on a chair. The responsive movements also help children to be aware of cause and effect. This builds the fundament for logical thinking. The cooperation and turn-taking in seesawing build

social skills and a beginning understanding of theory of mind: that others may want different things from you.

M190

## Handhold

**Physical:** the vertical handgrips ensure a firm grip at different heights, necessary for rocking intensely. This trains hand and arm muscles.

## Theme

**Cognitive:** suggests a theme and supports dramatic play, which stimulates language and communication skills.

## Rocking together

**Social-Emotional:** the possibility of rocking two together trains cooperation skills. Consideration of others when rocking.

## Rocking movement

**Physical:** response to movements adds to spatial awareness and sense of balance. These are fundamental motor skills that help the child's ability to sit still on a chair which takes a good sense of balance. **Cognitive:** trains the understanding of cause and effect: when I move my body, the spring responds with movement.

M190

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

Seat is made of HPL with a thickness of 17.8mm with a very high wearing strength and a unique KOMPAN nonskid surface texture.

The rocking movement over axis is made by heavy duty scaled ROSTA torsion spring element. The ROSTA element works without any noise and requires low maintenance.

Handholds are made of injection moulded high quality nylon (PA6). PA6 has good wearing and impact strength.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

| Item no. M19001-01P      |                          |
|--------------------------|--------------------------|
| Installation Information |                          |
| Max. fall height         | 60 cm                    |
| Safety surfacing area    | 9.2 m <sup>2</sup>       |
| Total installation time  | 2.8                      |
| Excavation volume        | 0.12 m <sup>3</sup>      |
| Concrete volume          | 0.00 m <sup>3</sup>      |
| Footing depth (standard) | 44 cm                    |
| Shipment weight          | 32 kg                    |
| Anchoring options        | In-ground ✓<br>Surface ✓ |
| Warranty Information     |                          |
| EcoCore HDPE             | Lifetime                 |
| Hot dip galvanised steel | Lifetime                 |
| Spare parts guaranteed   | 10 years                 |
| Springs                  | 5 years                  |

# Sustainability Data

M190

| Cradle to Gate A1-A3 | Total CO <sub>2</sub> emission | CO <sub>2</sub> e/kg    | Recycled materials |
|----------------------|--------------------------------|-------------------------|--------------------|
|                      | kg CO <sub>2</sub> e           | kg CO <sub>2</sub> e/kg | %                  |
| <b>M19001-01P</b>    | 72.49                          | 2.72                    | 28.46              |

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Themed play systems

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Themed play systems" represented by item no.: MSC641100-3717P.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

**Date: 30. October 2023 | Valid until: 30. October 2025**

**Verified by:**

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO<sub>2</sub> calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
