

Pollux

GXY942

Item no. GXY942012-3717

General Product Information

Dimensions LxWxH	679x491x293 cm
Age group	6+
Play capacity (users)	16
Color options	

With its spinning, swaying angles and shapes, POLLUX attracts thrilling balance play in 6-15 year olds. The inclined spinners invite smaller or bigger groups to spin until they get dizzy - a favourite activity of school age children and will attract them for a long time, again and again. The overhead rocking activity and the swaying ropes with UFO discs support the development

of upper body strength and cooperation with peers, it is also great fun for those seated on top being rocked. The Rocking Tube makes a challenging climb to the triangle plates. The wide variety of spin, climb, sway and hang activities train the child's coordination and sense of balance, which are important motor skills. The meeting points encourage

cooperation and turn-taking, skills easily learned in play.

GXY942

The steel surfaces of GALAXY are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Hollow plastic components are made of 100% recyclable PE made from 33% post-consumer materials. The play shell displayed is molded in one piece with minimum 5mm wall thickness to ensure high durability in all climates around the world.

GALAXY climbing triangle with outer soft layer of PUR and corner brackets of moulded nylon (PA6). The core consist of a powder coated welded steel frame with integrated corner suspension points. Larger triangles are closed with an 18mm thick Ekogrip® panel that has a top-layer of rubber with a non-skid effect.

Item no. GXY942012-3717	
Installation Information	
Max. fall height	249 cm
Safety surfacing area	71.0 m ²
Total installation time	19.8
Excavation volume	5.49 m ³
Concrete volume	2.36 m ³
Footing depth (standard)	90 cm
Shipment weight	965 kg
Anchoring options	In-ground ✓ Surface ✓

Bearing systems in heavy duty design in a maintenance free construction. All steel bearings are fully closed and lifetime lubricated.

The unique designed GALAXY connection ball is made with an inner circular core of aluminium surrounded by a shell of hard PP with a outer layer of soft TPV rubber. Flexible lead free aluminium connectors allow for installation in variable angles.

Galaxy products are available in different colour combinations with either hot dip galvanised steel surface treatment or optional with powder top finish of selected steel components. Colours of the activities are adjusted to support the individual colour combination.

Sustainability Data

GXY942

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
GXY942012-3717	2,122.80	3.18	37.00

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Challengers & Climbers

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Challengers & Climbers" represented by item no.: BLX410301-3717.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025

Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO₂ calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
