| Dimensions LxWxH | 28x28x30 cm | | | | |
| Age group | 2 - 12 | | | | |
| Play capacity (users) | 1 | | | | |
| Colour options | \bullet | | | | |

The Stepping Pod, 300 mm appeals to children with the simple play message of The Earth is Lava. Placing more Stepping Pods, in various heights, adds to attraction. It invites jumping or balancing from one to the next. As an individual Stepping Pod, it can function as a sturdy seat and invite a break from play. The Stepping Pod invites less confident balancing acrobats also, thanks to its sturdy rubber surface. When jumping up on and down from the Stepping Pod, children train their sense of balance. Balance is fundamental in confidently managing the body in its surroundings. This is important for instance when navigating street traffic safely. When jumping down, children additionally build bone density, as this is a build up in weight bearing activity on a hard surface.

Stepping Pod, 300mm

M87402

Sturdy rubber surface Physical: makes for a skid-resistant surface for jumping up and down, training muscle and motor skills and building bone density.

Stepping pod

Physical: young children learn how to alternate feet and balance. These are important for the proprioceptive and vestibular systems that help children navigate the world securely. Jumping down builds bone density and muscles.

Stepping point is made of SBR rubber. It has good heat and abrasion resistance.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Sustainability Data

Cradle to Gate A1-A3

Verification based on report: Validation of CO, calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.

Publication date: 30. October 2023

www.bureauveritas.dk

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
