## Super Combi 2, Supervised

FSW252

The Super Combi 2 Supervised has the same options as the standard Super Combi 2 but in addition has a connector for battle rope, a connector for a boxing bag, and a station for barbell exercises. This item is intended for supervised or gated areas such as sports or fitness clubs as these loose items do not satisfy safety standards for public areas.

### Super Combi 2, Supervised

200 cm

66.4 m<sup>2</sup>

Post are made of Ø101.6 x 2mm, pregalvanized carbon steel and powder coated, a great protection to all conditions.

The snake ladder is made of hot-dip galvanized s235 steel with the following dimensions Ø38 x 4mm. The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The rings are made of molded polycarbonate and TPE to ensure a good grip and soft surface. The rings are rotatable and allows for a large variety of exercises.

Total installation time 15.7 Excavation volume 1.25 m<sup>3</sup> Concrete volume  $0.75 \, \text{m}^3$ Footing depth (standard) 90 cm Shipment weight 954 kg Anchoring options In-ground Surface **Warranty Information** FcoCore HDPF Lifetime Hot dip galvanised steel Lifetime Movable parts 2 years Spare parts guaranteed 10 years Steel 10 years

Item no. FSW25200-0900 Installation Information

Max. fall height

Safety surfacing area

The top plate for the jumping platform is made of Ekogrip® panels that consist of a 15 mm polyethylene bottom layer, with a 3 mm top-layer of thermoplastic rubber with a non-skid effect for safe jumping exercises under all-weather circumstances.

The Dip-Station is designed with inclusive in mind, allowing wheelchair users to access the bars at either end. The two bars are placed at two different widths and heights - one narrow and high and one wide and low to allow for training of different individuals and muscle groups.

### **Sustainability Data**

FSW252

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO₂e/kg	Recycled materials
	kg CO₂e	kg CO₂e/kg	%
FSW25200-0900	1,477.44	2.45	57.35

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

### Verification of CO<sub>2</sub> calculation of: Fitness

Data version no. 2023-10-05

The  $\mathrm{CO}_2$  calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
