NRO409

The magical Wizard's Hideaway with an elevated house and blue roof invites dramatic play as few other structures can do. The benches and table inside stimulate social interaction and make longer stays desirable. A table on the side of the house invites meeting and provides a nice seat for care givers. The stair up to elevated level and the double slide

benefit motor skills such as cross coordination and spatial awareness. These are both fundamental for building up an understanding of the body in time and space, a competence important for managing obstacles and traffic safely. The stairway features a broad transfer platform and good handholds to support children of all abilities in accessing. All in all,

hours of magic play together.

## Side desk

**Social-Emotional:** fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

## Double slide

**Physical:** sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** invites socializing, supports parent-child and peer-to-peer play. **Cognitive:** young children train their understanding of space, speed and distances when sliding down quickly.

## Accessible stairway

**Physical:** climbing the accessible stairway is for all and supports cross coordination as well as arm and leg muscles. For young children, walking stairs and alternating feet is developed. **Social-Emotional:** room for active breaks and adult helpers. An inclusive space.

## Platform

**Social-Emotional:** Important life skills like courage, self-confidence, consideration and turn-taking are built.

## Theme

**Cognitive:** suggests a theme and supports dramatic play, which stimulates language and communication skills.

## Bench

**Social-Emotional:** invites socializing and cooperation. Allows for a break with friends.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
