

# Medite with Add Ons

COR10513

Item no. COR105131-0403	
General Product Information	
Dimensions LxWxH	622x908x446 cm
Age group	5+
Play capacity (users)	46
Colour options	

The feeling of achievement when the children climb The Medite with Add-Ons to the top is great. Climbing and swaying on the bouncy nets with rubber seats train the motor skills' ABC: Agility, Balance and Coordination. Major muscle groups are used when children climb in the net. The swaying play ropes train balance – a motor skill that is fundamental for children's

ability to sit still and concentrate. The slide is a great way down making an irresistible loop of climbing up and sliding down training turn-taking skills. The membranes are thrilling destinations up high and stimulate children's social-emotional skills such as courage and self-regulation. Ground level access is provided with the slightly tilting side nets, training

proprioception and cross-coordination. All in all, a climbing adventure for the whole family.

COR10513

## Membrane path

**Physical:** a faster way up, due to the extra support of the membrane. **Social-Emotional:** a meeting path with points for retreat from the rope landscape.

## Connected nets

**Physical:** the connected nets make the climbers feel the movements of the other climbers. All muscle groups are trained, as well as cross coordination. **Social-Emotional:** the climbers' movements affect the other climbers, so consideration and turn-taking is supported.

## Height

**Social-Emotional:** children develop courage and self-regulation when being up high. This positively affects self-confidence.

## Twisted net

**Physical:** the big meshes allow for climbing and crawling through, supporting proprioception, spatial awareness, cross coordination, and muscle strength, pushing and pulling arms to get upwards. **Social-Emotional:** the big meshes allow more children being seated together, sharing.

## Slide

**Physical:** develops spatial awareness, sense of balance and trains core muscles when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking.

## Ropes with rubber discs

**Physical:** children develop cross-body coordination and muscle strength when climbing the rope. Their sense of balance is trained when swaying gently. **Social-Emotional:** socialising and turn-taking when deciding who should sit here.

## Climbing net

**Physical:** the inclined net supports the upward climbing movement of the body. Cross-coordination, spatial awareness and physical strength are trained. **Social-Emotional:** the big meshes allow for more children being seated together, sharing.

COR10513

Designed to allow the typical function of rope play structures to move Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector. Our clamps are safe, durable and vandalism-proof.

The aluminium swages of the net are double conical with rounded ends and are as small as safety allows. The overall net design aims at keeping metal parts within the net to an absolute minimum, both in size and number, to provide the best possible rope climbing experience.

Corocord membranes consist of friction-proof rubberised material of conveyor belt quality with excellent UV resistance. Tested and compliant with REACH requirements for PAH. Embedded is a four-layered armouring made of woven polyester. The armouring and the two surface layers result in a total thickness of 7.5 mm.

The metal parts are made from high-quality steel consisting of hot-dip galvanisation on both the inside and outside and also includes lead-free zinc and an additional layer of powder coating. This ensures both excellent corrosion resistance and colourful design expression.

The COROCORD Frame Nets are available in 8 colour themes, ranging from elegant to expressive black or a natural neutral sand colour section to bright eye-catching signal colours which appeals to children of all ages.

The stainless steel components are made of high-quality stainless steel in compliance with global playground standards. The steel is glass blasted after manufacturing to ensure a smooth gliding surface.

Item no. COR105131-0403	
Installation Information	
Max. fall height	174 cm
Safety surfacing area	74.1 m <sup>2</sup>
Total installation time	41.0
Excavation volume	5.70 m <sup>3</sup>
Concrete volume	3.41 m <sup>3</sup>
Footing depth (standard)	110 cm
Shipment weight	1,672 kg
Anchoring options	In-ground ✓
Warranty Information	
Corocord (Hercules) Rope	10 years
EcoCore HDPE	Lifetime
Galvanised Steel	Lifetime
Membrane	2 years
Spare Parts Guarantee	10 years

# Sustainability Data

COR10513

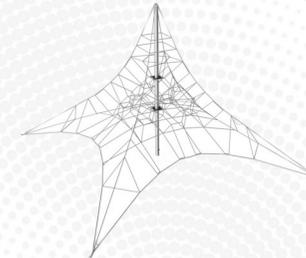

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
<b>COR105131-0403</b>	3,934.60	3.52	45.74

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Corocord

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
