The Embankment Tunnel Slide is extremely attractive. It makes children loop up hill and slide down again and again. The Embankment Tunnel Slide could be the main attraction in a playground. Apart from the immense thrill of sliding, the Embankment Tunnel Slide also give children support in developing important motor skills. Children train the sense of space and

balance. These are important when managing the world securely, avoiding falls and accidents. Gaining the courage to go down the steep tunnel adds a sweet sensation of achievement when sliding the Embankment Tunnel Slide. This is a social-emotional benefit, which is further enhanced by the cooperation and turn taking skills that children train when

entering. The width of the slide invites rides with friends. The slide mouth is extra long to add a feeling of security.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
