The HOLLAND Play Tunnel with Hammock and Desk is a nice ground level activity with great play value. It stimulates children's physical, social-emotional and cognitive development. The play tunnel is a fine place to stimulate cross-body coordination when crawling through. Cross-body coordination supports both sides of the brain, important for children's

reading and writing skills. The tunnel also provides room for more children to have a sheltered meeting spot stimulating social skills. The hammock offers the opportunity for rocking gently, seated or lying. It is a perfect and easily accessed spot for a moment of relaxation. Even though dimensioned for one user, children often find ways to use it together,

stimulating social-emotional development. The desk supports imaginative play, allowing children to play for hours.

## Tunnel

**Physical:** the children crawl through the tunnel, developing motor skills such as cross-body coordination and proprioception. **Social-Emotional:** turn-taking when passing each other.

## Desk with bowl and sieve

**Social-Emotional:** children can gather and store materials, cooperate and take a break together. **Creative:** sand can be shifted through the sieve, for understanding of cause and effect and object permanence.

## Hammock

**Physical:** coordination and sense of balance when swaying. **Social-Emotional:** meeting, pushing friends gently back and forth, turn-taking. **Cognitive:** for toddlers cause and effect understanding.

All steel components are made of high quality materials. The posts have an alloy with improved tensile and yield strength according to the NYCP material specification. The painted aluminum post caps are riveted to the top of the post.

All panels and one-piece welded steel grids are made of low carbon steel and corrosion treated by hot dip galvanization or metallization with a minimum thickness according to NYCP material specification.

The product is designed in three different standard color combinations: Red and light blue, Light blue and lime green, Green and lime green. The layouts of the play structures can be customized through the KOMPAN Variant Team.
