The richly varied Fire Station & Firetruck is an all-in-one play offering which will thrill children again and again. The fascinating theme appeals to children and inspires endless play conversations and scenarios of rescue play. This make-believe play is an efficient stimulation of children's vocabulary, imagination and problem-solving skills during social play. The firetruck theme spans all

levels and parts of the play combination, with richly varied ground level and elevated level play experiences. On ground level, a wealth of tactile and dramatic play motivators invite play for all abilities, around, in an under the play structure. A soft hammock allows for swaying rest. Several routes lead to elevated level: Climbing wall, net, rungs and Climbing net. From the elevated level, a slide and a highly

thrilling fireman's pole offer stomach tickling rides back to ground level, stimulating the child's spatial awareness. The seated position when sliding is a good training of trunk stability and sense of balance. All of these motor skills are important in motion efficiency and spatial mastery, which are important skills in for instance managing street traffic securely.
