The Toddler's Castle with Rock Climber is an inviting playground activity that attracts children to be active and to interact in thrilling ways. The cat side has a nice table with play ring and sand sieve, inviting exploration, meetings and socializing, the beginning of the first friendships. The stairway is wide and accommodates crawling. So does the steeper

rock-climb, adding to variety. This trains children's cross-coordination, an important motor skill that among others support later reading skills. Sliding is a great thrill for the youngest. It stimulates trunk stability and the sense of balance, and trains spatial understanding. These skills are important in navigating the world securely. They are the

fundament of all motor skills and thus a fundament in physical confidence. The familiar themes inspire stories, developing language skills.
