

Miracle Sphere

COR88100

The eight legged, spider-like Miracle Sphere hugely appeals to children. With its webs of diverse climbing opportunities, it will attract children again and again. The swaying ropes, nets and rubber ladders offer fun climbing challenges to the vertical top net. With its spread out access points to the top net, the Miracle Sphere caters for a lot of children in fun

play at the same time. Apart from being great fun, the Miracle Sphere offers ample training of all major muscles and fundamental motor skills, all muscles are in use when clinging on to the ropes or climbing up high. Important motor skills such as cross-body coordination and spatial awareness are used. These skills are fundamental e.g. when judging distances and

managing traffic securely. The horizontal top net is a great venue for meeting friends, socializing and helping one another up find a way up to chill and enjoy the view.

Item no. COR881001-0402

General Product Information

Dimensions LxWxH	400x400x330 cm
Age group	5+
Play capacity (users)	32
Colour options	

Miracle Sphere

COR88100

Horizontal net

Physical: cross coordination is developed when climbing over and sense of space when looking down. **Social-Emotional:** space for socializing and bouncy breaks.

Big meshes

Physical: the big meshes allow for climbing and crawling, supporting proprioception, cross coordination and spatial awareness. Climbing here takes muscle strength, pushing and pulling arms to get upwards. **Social-Emotional:** allow more children being seated together, sharing.

Connected nets

Physical: the connected nets make the climbers feel the movements of the others, adding a dimension of fun and demanding concentration when holding tight to the rope. Cross-coordination and all muscle groups are trained. **Social-Emotional:** the climbers' movements affect the other climbers, so consideration and turn-taking is supported.

Vertical side ropes with steps

Physical: children develop cross-body coordination and muscle strength when using the steps climbing the rope. Their sense of balance is trained when swaying gently. The sense of balance is important for instance for being able to sit still. **Social-Emotional:** turn-taking when children pass each other.

Membrane loops

Physical: develops leg, arm and core muscles as well as motor skills such as cross coordination and proprioception. **Social-Emotional:** showing consideration of others and helping others when passing one another going up or down.

Transparency

Social-Emotional: the transparency makes possible cooperation and communication throughout, all important life-skills for children to learn.

Rope with rubber disc

Physical: children develop cross-body coordination and muscle strength when stepping onto the disc and climbing the rope. Their sense of balance is trained when swaying gently. The sense of balance is important for instance for being able to sit still. **Social-Emotional:** socializing and turn-taking when deciding who should sit here.

Miracle Sphere

COR88100

Corocord membranes consist of friction-proof rubberized material of conveyor belt quality with excellent UV resistance. Tested and compliant with REACH requirements for PAH. Embedded is a four-layered armoring made of woven polyester. The armoring and the two surface layers result in a total thickness of 7.5 mm.

Corocord aluminium clamps are used as connectors between steel posts and rope. The aluminium casting is screwed into the steel post and connects safely to the rope.

Fully coloured EPDM rubber discs with smooth surface. The moulded EPDM surrounds a hot dip galvanised steel core that ensures both the stability of the discs and durable fixation to the rope.

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand. The ropes are highly wear- and vandalism-resistant and can be replaced at site if needed.

Corocord 'S' clamps are used as universal connections in Corocord products. 8mm stainless steel rods with rounded edges are pressed around the ropes with a special hydraulic press, making them the ideal connector: safe, durable and vandalism-proof, all while allowing the typical movement of rope play structures.

Item no. COR881001-0402

Installation Information

Max. fall height	240 cm
Safety surfacing area	48.5 m²
Total installation time	27.1 hours
Excavation volume	8.17 m³
Concrete volume	2.32 m³
Footing depth (standard)	65 cm
Shipment weight	1,076 kg
Anchoring options	In-ground ✓

Warranty Information

Aluminium clamps	10 years
Corocord rope	10 years
Membrane	2 years
S-Clamps	10 years
Spare parts guaranteed	10 years

Sustainability Data

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Corocord

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Corocord" represented by item no.: COR314011-1101.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
