FPW206

Street workout is a physical activity that symbolises the freedom of movement and encourages socializing. It is a combination of athletics, calisthenics and other sports, and mostly performed in the public space. The incline press is specifically designed for beginners that are having a hard time with push ups and pull ups. The side handles offer

different positions and heights to place hands or feet, allowing the user to decrease and increase own bodyweight while performing exercises like push ups. The top bar makes it possible to do many more exercises. From pull ups where you train the upper body to knee raises that work your abdominal muscles.
