This toddler-sized Labyrinth with 3 Rooms will provide hours of fun for young children. The carefully designed structure offers play opportunities in all areas: physical, social-emotional, cognitive, and creative. Children will enjoy moving their bodies in and out as well as around the structure. The thoughtfully placed rubber knee-protectors placed in the crawl-

through openings welcome this behavior. These motions support important physical as well as spatial understanding skills. The open 360 design also supports cooperation and parallel play, which develops the social-emotional skills of the child. A rich variety of open-ended sensory elements including the mega-phone, bubble window, play spheres and

play rings stimulate the understanding of cause and effect, through movement and sound, strongly supporting cognitive development in the young child.
