sand scoops, gears, and pieces of fruit all offer different types of cause and effect movements that children notice and act upon. This helps children to develop logical thinking based on motor planning, key developmental tasks. The counter and window encourage social play and may even inspire dramatic play, as the Magic Garden could be a florist shop in the minds of the children. Dramatic play spurs language development everyday.

Sand scoops

Physical: hand eye coordination and pushpull movements. Social-Emotional: invites cooperation with two sides and provides for parallel play. Cognitive: logical thinking: cause and effect understanding when running scoops in grooves or shifting materials from scoop to scoop. Creative: shifting scoops, creating new scoop positions.

Desk Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

Megaphone Social-Emotional: inspires communication and turn-taking skills. Cognitive: distortion of sound evokes curiosity and stimulates an understanding of cause and effect.

Gear wheel Social-Emotional: invites cooperation with two sides and provides for parallel play.

Panels of 19mm EcoCore[™]. EcoCore[™] is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material.

The steel surfaces are hot-dip galvanized inside and outside with lead-free zinc. The galvanization has excellent corrosion resistance in outside environments and requires minimal maintenance.

Play activities like the play sphere are made of injection molded high quality UV-stabilized nylon (PA6). Nylon has good wearing and impact strength.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
