M259

The Lucky Clover is a slick, cute, super multifunctional play piece. It appeals to infants and toddlers repeatedly, thanks to its age appropriate height and dimensions. The Lucky Clover adds a space to sit and meet or step up and jump from. As a seat, the Lucky Clover provides a welcome place for toddlers to take a break from the wilder playground action and gather energy for the next play moves. This supports the toddlers confidence and the time spent in play. The next play moves may well be climbing up and jumping down from the Lucky Clover. This supports the cross-coordination, sense of balance and space and the building of bone density. This is important for the toddlers healthy development.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
