As a single item, the step bench is already one of the most versatile pieces of exercise equipment. The KOMPAN Sport & Fitness app covers more than 50 exercises that you can do with it. By putting four in a row you also create a great element for an obstacle course. At each step the exercise becomes heavier and more power is needed to get on top, whether you step or jump.

The support frame is $\varnothing 48.3 \times 4$ mm, carbon steel, with a hot-dip galvanised surface according to ISO1461, and a powder coating corrosion class C3 according to ISO12944-2. Lead content for surfaces are below 90ppm.

The surface is produced of recycled SBR (Styrene Butadiene Monomer, Synthetic Rubber) for optimal grip during jumping and step on step off exercises under all weather circumstances.

A 5 mm hot-dip galvanised carbon steel plate must be moulded inside the SBR to offer optimal stability and optimize the mounting of the step to the frame.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
