## **Over Under Robinia**

FRO214

Trained athletes will go over the high bar and underneath the low bar, while the beginners will do it the other way around. A great way to train, strength, agility, coordination, and flexibility. The Over-Under obstacle is a great example that everyone can be challenged at their own level. The bars are positioned close to another therefore a combination of the lower body and

upper body strength is required to overcome this obstacle.

The Robinia bars are made from de-barked and sap-free Robinia trunks in various dimensions. Robinia is a native European wood species with high strength and natural durability in various climatic conditions. KOMPAN uses wood from FSC-certified

sources.

## **Over Under Robinia**

FRO214

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The Robinia wood can be supplied as untreated raw wood or painted with a brown coloured transparent pigment that maintains the golden wood colour of the wood.

The FSW 209 features three 38 x 2mm push up bars at three heights of respectively 38cm, 58cm and 133cm.

Item no. FRO21400-1001				
Installation Information				
Max. fall height		118 cm		
Safety surfacing area	3	35.1 m²		
Total installation time		5.7		
Excavation volume	•	1.01 m³		
Concrete volume	(	0.30 m³		
Footing depth (standard)	•	100 cm		
Shipment weight		330 kg		
Anchoring options	In-ground	· •		
	Surface	•		
Warranty Information				
Hot dip galvanised steel	L	ifetime		
Robinia wood	15 years			
Spare parts guaranteed	10	) years		

All KOMPAN fitness products are compliant with the ASTM F3101 & EN16630 Outdoor Fitness Standards. Load tests are performed as a static test by adding dynamic factors as well as safety factors to the specified load of 78kg per user. A product intended for 1 user is loaded with 420kg.

**Sustainability Data** 

FRO214

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO₂e/kg	Recycled materials
	kg CO₂e	kg CO₂e/kg	%
FRO21400-1001	79.72	0.33	4.21

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

### Verification of CO<sub>2</sub> calculation of: Fitness

Data version no. 2023-10-05

The  $\mathrm{CO}_2$  calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
