KOMPAN
Let's play

The Parallel Bars are suitable for beginners who want to learn how to do dips. They can start with leaning push-ups against the bar, and can later move on to actual dips, which can initially be made easier by resting the feet on the additional bars. An innovative magnetic breaking system in the Magnetic Bells allows the user to increase the resistance by

increasing the speed of movement. The patented system also functions as a brake when someone drops the magnetic bells and will reduce the impact significantly. The Magnetic bells move freely up and down and can spin 360°. This allows the users to do exercises that are very similar to Medicine balls and Kettle Bell exercises.

Item no. FAZ20300-0900

General Product Information

Dimensions LxWxH 1050x106x334 cm

Age group 13+

Play capacity (users) 9

Cross Training Pro Combi 2

FAZ203

The uniquely designed handles are made of PUR and a reinforced aluminium frame that ensures a strong but light design. The ergonomically shaped handles guarantee a good and pleasant grip for all users.

The big instruction signs are made as a sandwich construction consisting of 2 x 6mm polycarbonate sheets with clear instructions printed on the inside of the panels. This provides a vandalism proof solution.

The magnets which are used are high strength neodymium magnets. The magnetic radiation is under strict control, the radiation level never exceeds 5 Gauss (0.5mT), which makes them perfectly safe to use as a training item.

Item no. FAZ20300-0900	
Installation Information	
Max. fall height	124 cm
Safety surfacing area	47.5 m²
Total installation time	13.6
Excavation volume	1.63 m³
Concrete volume	0.83 m³
Footing depth (standard)	90 cm
Shipment weight	838 kg
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
Coated Steel Parts	10 years
PUR Components	10 years
Ropes & Nets	10 years
Signs	10 years
Spare Parts Guarantee	10 years

The tubes on which the magnetic bells move on are ø40mm, made of grade AW 6082-T6 aluminium and have an anodized layer of 20µm. The tube has a full steel core for structural integrity.

The product offers two sets of parallel bars ø48.3 x 4mm, three different heights (104, 114 and 124cm) and four lower sidebars ø33.7 x 3mm. Combined, these six bars offer a wide variety of training options.

Each suspension trainer has three sets of handles positioned at three different heights, 40, 90 and 130cm. This allows people of all heights to do the exercises and gives the user the opportunity to do over 40 different exercises.

Sustainability Data

FAZ203

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
FAZ20300-0900	2,048.70	3.13	44.58

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Fitness

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
