Wow! The amazing Six Tower Mega Deck offers a wealth of diverse climbing, crawling, gliding and sliding experiences that will make children want to come back again and again. On ground level, the Play Panels and Hammocks create fun play retreats for quieter play, whilst the Talk Tubes invite for social play together with friends. Apart from being

enormous fun, the many ways of climbing up to the towers train the child's muscles and cross-coordination, important motor skills that also benefit e.g. reading skills. All the thrilling and diverse bridges intensely train the sense of balance, beneficial for the child's motor skills and thus its body confidence. The exciting egresses are for timid as well as wilder players,

from the Slide to the Banister Bars to the dare-devil Fireman's Pole. Playing here trains major physical development areas. It also guarantees fun play with friends, stimulating social-emotional developmental domains.

## Curved slide

**Physical:** sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking.

## Tic-tac-toe panel

**Social-Emotional:** stimulates communication and turn-taking skills. **Cognitive:** support rules understanding, strategic thinking. **Creative:** leaving marks when tumblers are left in new positions.

## Hammock

**Physical:** coordination and sense of balance when swaying. **Social-Emotional:** meeting, pushing friends gently back and forth, turn-taking.

## Talk tube

**Social-Emotional:** encourages communication and social interaction. **Cognitive:** evokes curiosity and stimulates an understanding of cause and effect and object permanence: objects and persons exist also when out of sight.

## Wackle bridge

**Physical:** sense of balance and space, and training of posture. Important for being able to sit still. **Social-Emotional:** cooperation, turn-taking and friendly competition on the plates.

## Banister bars

**Physical:** coordination is supported when going down, as well as arm and core muscles. Landing strengthens bone density, which is built for life in childhood. **Social-Emotional:** turn-taking and risk-taking.

## Curly climber

**Physical:** coordination and proprioception are supported when placing arms and legs correctly for going down. Sense of balance when rotating. Arm muscles for holding tight. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** logical thinking when placing arms and legs right for rotating downwards.
