KOMPAN
Let's play

The classic KOMPAN embankment slide promotes fun play activity for all children (and those childish at heart). Due to the embankment run loop, children will run up and slide down again and again. Sliding on the embankment slide is an extra fun experience, as friends can run up or down next to their sliding friend. There is room for many children

of different ages and abilities. The embankment hill is a great place for rolling and running too. This is fun, playful cardio training for children. When children slide, they train their core muscles, sitting upright while rolling down. This stimulates trunk stability, important for avoiding back and neck pains, a growing problem in children due to sedentary lifestyles. Running

uphill or downhill, children train their balance and coordination as well as their muscle strength. They develop risk management skills, too, holding back or letting go downhill.

| Item no. M36570-3418P | |
| Installation Information | |
| Max. fall height | 100 cm |
| Safety surfacing area | 15.0 m² |
| Total installation time | 3.4 |
| Excavation volume | 0.21 m³ |
| Concrete volume | 0.00 m³ |
| Footing depth (standard) | 95 cm |
| Shipment weight | 141 kg |
| Anchoring options | In-ground ✓ |
| Warranty Information | |
| EcoCore HDPE | Lifetime |
| Spare parts guaranteed | 10 years |
| Stainless steel slide | 10 years |

Sustainability Data

| Cradle to Gate A1-A3 | Total CO ₂ emission | CO ₂ e/kg | Recycled materials |
|----------------------|--------------------------------|-------------------------|--------------------|
| | kg CO ₂ e | kg CO ₂ e/kg | % |
| M36570-3418P | 121.97 | 1.57 | 68.32 |

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: GXY916012-3417.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
