PCM212222

537x406x382 cm

WOW! The Play Tower with Turbo is full of play value. It will attract children again and again with its multiple play activities, it's accessible stairway and climbing wall. These will help train children's cross-coordination, which is important for the ability to e.g. read. The fireman's pole will see the child whizzing down training an understanding of space and

distances that is useful for example in managing street traffic securely. From the tower platform, the child can also access the fabulous Turbo Challenge: Hanging in hands or knees children cooperate in getting across and spinning together. This promotes taking turn skills and all round awareness. This is the fundament in managing the body confidently in

the world.

**General Product Information** 

PCM212222

### Turbo challenge

Physical: upper body muscles are trained when hanging. Agility, proprioception and coordination are trained when spinning from one ring to the next. Social-Emotional: the sections of each of the spinners allow for more children hanging in arms or knees, cooperating. This trains empathy and turntaking skills.

### Fireman's pole

Physical: supports coordination, arm and core muscles. Landing strengthens bone density. Social-Emotional: turn-taking and risk-taking.

### Pipe ladder

Physical: cross coordination and eye-hand coordination are supported when children climb the ladder. The climbing also supports leg and arm muscles. Social-Emotional: learning about turn taking and cooperation.

### Score board Accessible stairway

Social-Emotional: teams can each have a button to measure rounds, wins etc. The buttons support cooperation and teamwork. **Cognitive:** counting and registering support thinking skills such as logical thinking and sequencing.

Physical: climbing the accessible stairway is for all and supports cross coordination as well as arm and leg muscles. Social-Emotional: room for active breaks and adult helpers. An inclusive space.

Climbing wall

Physical: develops children's cross coordination, eye-hand coordination, and muscle strength when climbing. Social-Emotional: two-sided climb invites cooperation.

Physical: develops spatial awareness, sense of balance and trains core muscles when sitting upright going down. Social-Emotional: empathy stimulated by turn-taking.

PCM212222

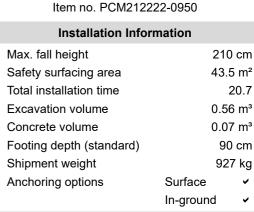

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

Main posts with hot dip galvanized steel footing are available in different materials: Pressure impregnated pine wood posts. Pre-galvanized inside and outside with powder coated top finish steel posts. Lead free aluminum with color anodized top finish. Greenline TexMade posts of 95% post-consumer recycled PE and textile waste.

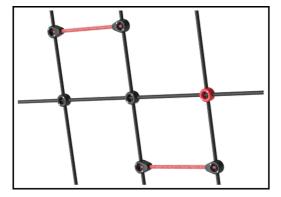

All decks are supported by unique designed low-carbon aluminum profiles with multiple attachment options. The grey colored molded decks are made of 75% post-consumer waste PP material with a non-skid pattern and texture surface.

Warranty Information

EcoCore HDPE Lifetime
Post 10 years
PP Decks 10 years
Ropes & Nets 10 years
Spare Parts Guarantee 10 years

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand.

Wood version of FSC®-certified (FSC®C004450) pine wood with pressure impregnated base treatment and brown painted top finish. Vertical boards and top ends protected by a unique aluminum profile for high outdoor durability.

Shade sails of commercial 95 high density PE knitted specially for sunshade structures. The sails are treated with UV stabilisers to ensure a long lifetime. The sails are supported by a hot dip galvanised steel frame. Closed sail equipped with an easy take down system.

## **Sustainability Data**

PCM212222

Cradle to Gate A1-A3	Total CO₂ emission	CO₂e/kg	Recycled materials
	kg CO₂e	kg CO₂e/kg	%
PCM212222-0950	865.11	1.35	76.07
PCM212222-0901	971.53	1.73	68.98

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Play systems

Data version no. 2023-10-05

The  $\mathrm{CO_2}$  calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
