

Assisted Step

FSW222

Item no. FSW22200-0902	
General Product Information	
Dimensions LxWxH	151x44x118 cm
Age group	13+
Play capacity (users)	1
Color options	

See KOMPAN Fit app for more

The step is probably the most simple and versatile device available. The step-up exercise is an essential exercise that can be used for both strength, posture control and cardio exercise. For accommodating the balance and safety challenges for elderly people, the step is complimented with a support rail.

Assisted Step

FSW222

The information sign is made of a PA6 (Polyamide) and shows the most relevant exercise and a QR code. When scanned the QR code will link to an animated illustration of the exercise and offers the possibility of downloading the KOMPAN sport & fitness App, which will provide a large amount of exercises and workouts.

The connectors are made of die-cast aluminium, specially alloyed for the outdoor environments and heavy usage. The screws attaching the connectors are stainless steel and protected by zinc washers.

Handrail intended as grips during exercises are made of hot-dip galvanised steel $\varnothing 38\text{mm}$, a great diameter for a good grip and to support the wrist. The height of the handrail is 940mm from the top of the HPL plate. The distance between the rails is 900mm.

Item no. FSW22200-0902

Installation Information

Max. fall height	20 cm
Safety surfacing area	12.3 m ²
Total installation time	2.7
Excavation volume	0.18 m ³
Concrete volume	0.10 m ³
Footing depth (standard)	90 cm
Shipment weight	98 kg
Anchoring options	In-ground ✓ Surface ✓

The half ball is $\varnothing 500 \times 250$. The material is SBR granular rubber, recycled SBR (Styrene Butadiene Monomer, Synthetic Rubber) UV stabilised to a maximum without use of heavy metal stabilisers, for optimal grip during jumping and step on step off exercises under all weather circumstances.

Post are made of $\varnothing 101.6 \times 2\text{mm}$, pre-galvanized carbon steel and powder coated, a great protection to all conditions.

A 5 mm hot-dip galvanised carbon steel plate must be moulded inside the SBR to offer optimal stability and optimize the mounting of the step to the frame.

Sustainability Data

FSW222

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
FSW22200-0902	166.30	2.45	59.00

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Fitness

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Fitness" represented by item no.: FAZ10100-0900.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025
