

Trader

PCE50321

The Trader, with its fine enclosed play space, is an opportunity for quieter play. The panels support sand play, and the sand-transporting funnels stimulate the child's understanding of object permanence: although you can't see something, like sand in a pipe, the sand is still there. The sand scoop panel adds activities for fine motor skills, but also trains logical thinking.

When positioned correctly sand can be shifted from one scoop to the next. The fun climb panel invites shifting things through holes, but also adds a low climb-and-crawl over activity, creating two spaces: the inside and outside. The three sides have different heights, generating varied points for social interaction. The Trader can be used by many children, on

the inside as well as outside.

Item no. PCE50321-0603	
General Product Information	
Dimensions LxWxH	179x176x303 cm
Age group	1+
Play capacity (users)	6
Colour options

Desk

Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides to create a social scenario that supports communication and cooperation.

Wall climber

Physical: crawling up supports cross coordination and trains major muscle groups.

Funnel

Social-Emotional: trains cooperation and turn-taking as children put materials into the funnel. **Cognitive:** the passing of materials through funnels supports the children's logical thinking and for younger children the understanding of object permanence: that materials don't vanish but run through at the other end.

Changeable sand funnel

Social-Emotional: supports cooperation and turn-taking as children pour water or materials into the funnel. **Cognitive:** the passing of materials through funnels develops children's logical thinking, for younger children the understanding of object permanence: that materials do not vanish, but run through. **Creative:** the sand funnel can be turned, creating new directions of dispensing materials.

Sand scoops panel

Physical: hand eye coordination and push-pull movements. **Social-Emotional:** invites cooperation due to the two-sides and provides for parallel play. **Cognitive:** logical thinking: cause and effect, when running scoops in grooves or shifting materials between scoops. **Creative:** shifting scoops, creating new scoop positions.

The Curved ELEMENTS panels are moulded of UV stabilised recyclable PE with multiple options for in-build play features that also ensures a strong panel solution. Straight panels are made of KOMPAN 19mm PE EcoCore™ which is a highly durable, eco-friendly and recyclable material.

ELEMENTS decks are made of 17.8mm thick HPL supported by a uniquely designed aluminium frame with multiple attachment options by the usage of aluminium connectors. The main posts are made of high-quality pre-galvanised steel with a powder-coated top finish. Post tops are closed with caps of UV stabilised nylon (PA6).

The ELEMENTS roofs are made of recyclable PE with a minimum wall thickness of 5 mm to ensure high durability in all climates around the world. The steel pipes are hot-dip galvanised inside and outside for maximum durability.

ELEMENTS products are available in three different colour combinations: 1. classic blue, green2. blossom, orange, yellow3. nature lime, green

Item no. PCE50321-0603

Installation Information

Max. fall height	46 cm
Safety surfacing area	17.1 m²
Total installation time	7.5 hours
Excavation volume	0.39 m³
Concrete volume	0.27 m³
Footing depth (standard)	60 cm
Shipment weight	167 kg
Anchoring options	Surface ✓ In-ground ✓

Warranty Information

Curved Panels	10 years
EcoCore HDPE	Lifetime
Galvanised Steel	Lifetime
Post	10 years
Spare Parts Guarantee	10 years

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Play systems

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025

Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO₂ calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
