The EcoCore™ is a highly durable, ecofriendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material. The core has a thickness of 0.59 and representing 80% of the total material. The fully flat inside gives the best bounce experience when playing. The flat wall becomes a part of the game and adds a new

dimension to it, a dimension that can challenge and develop players' tactical vision of the game. The 9'10" x 6'7" Multi Goal follows the goal size of FIFA Futsal and IHF Handball regulations. The basketball hoop is placed at the official NBA height of 10 feet, and has the official NBA size of 18 inches in diameter."

The HDPE panels are standard available in Night Sky Blue, Grey and Orange but multiple colors can be requested. To increase the design and play value you can also choose HDPE panels with patterns or logo's engraved.

The Panna Goals are 118 x 68cm and the distance between the vertical ø21.3mm tubes is 68mm, small enough to keep all balls in play. The goal is framed with coloured HDPE strips to highlight the target.

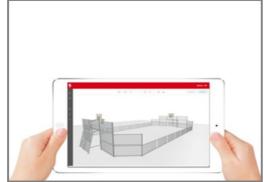

The posts are made of $80 \times 80 \times 3$ mm profile with horizontally, 6mm welded flanges. This will enable an easy installation and strong construction. The low-density polyethylene post caps are attached with blind rivets.

Each panel has 4 Thermoplastic Vulcanizates plugs connecting the panels to the posts. The plugs reduce the vibration and therefore reduce the noise level. The plugs will also simplify installation as the come with pre-assembled nuts.

KOMPAN Multi Use Games Areas (MUGA) are designed as a flexible system. With the configurator you can easily change size, height, panels, entrances and goals to create a MUGA that fits your environment, budget and purpose.

The HDPE panels are connected with M8 stainless steel bolts to 42.5 x 40 x 3mm welded flanges. These connections are not visible from the inside and create a strong and safe connection.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
