

# Double Tower with Spider Net ADA

NRO2006

Item no. NRO2006-1021	
General Product Information	
Dimensions LxWxH	469x686x440 cm
Age group	3+
Play capacity (users)	14
Color options	

The Double Tower with Spider Net is a fantastic and versatile play piece that children will want to try again and again. The spider net has partly inclined horizontal rungs, which adds challenge to the climb. It is a fine meeting point, inviting children to cooperate and take turns, stimulating their social-emotional development. Climbing trains the cross-

coordination, which again trains cross-modal perception, necessary for reading. The tower is a great destination for all, taking children via accessible stairs to the options of a slide or a rotating movement down on the Curly Climber. The Curly Climber stimulates the proprioception and sense of space and balance. On ground level a somersault bar

provides horizontal rotation, training the sense of space.

NRO2006

## Slide

**Physical:** sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking.

## Vertical spider net

**Physical:** cross coordination is supported when crawling through, over and across the net. This supports the cooperation of left and right brain half, important for skills such as reading. The core, arm and leg muscles are strengthened. **Social-Emotional:** taking a break together in the net and waiting for others to cross supports social abilities such as cooperation and communication.

## Somersault bar

**Physical:** develop balance and core when hanging from knees. Arm, leg and core muscles are developed when climbing up, somersaulting around. Balance and spatial awareness are strengthened. **Social-Emotional:** meeting, socializing and turn-taking when climbing up and down via bar.

## Accessible stairway

**Physical:** climbing the accessible stairway is for all and supports cross coordination as well as arm and leg muscles. For young children, walking stairs and alternating feet is developed. **Social-Emotional:** room for active breaks and adult helpers. An inclusive space.

## Curly climber

**Physical:** coordination and proprioception are supported when placing arms and legs correctly for going down. Sense of balance when rotating. Arm muscles for holding tight. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** logical thinking when placing arms and legs right for rotating downwards.

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

The paint used for coloured components is water based environmentally friendly with excellent UV resistance. The paint is in compliance with EN 71 Part 3.

The stainless-steel slides with one-piece slide bed are made of high-quality stainless-steel AISI 304.

Item no. NRO2006-1021	
Installation Information	
Max. fall height	220 cm
Safety surfacing area	53.0 m²
Total installation time	31.2
Excavation volume	1.82 m³
Concrete volume	0.30 m³
Footing depth (standard)	100 cm
Shipment weight	1,559 kg
Anchoring options	In-ground ✓

Ropes of UV-stabilized PES rope strands with inner steel cable reinforcement. The polyester yarn is made from +95% post-consumer materials and is inductively melted onto each strand.

The hardware is made of stainless steel or galvanised steel to ensure durable connections with a high corrosion resistance.

The Robinia products are designed with a KOMPAN colour concept with a number of different standard colours. The wood can also be supplied as untreated or with brown painted with a pigment that maintains the wood colour.

# Sustainability Data

NRO2006

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
NRO2006-1021	664.47	0.54	6.89

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

## Verification of CO<sub>2</sub> calculation of: Nature play

Data version no. 2023-10-05

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Nature play" represented by item no.: NRO409-0621.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
