Sandpits are a playground favourite, which invites children to be creative and engage in sensory play. The four red seats or tables, provide children and carers with a firm base to sit on or to build their creations on. The four seats additionally give children the possibility of creating their own space, where they can have their home, shop or workshop. Sand invites

deep play and educates children on the changeable character of sand as it goes from dry to wet. It additionally trains children's tactile senses which are essential life skills that help children to understand their surrounding world.

The seats are made from 19mm EcoCore™ which is a highly durable, eco-friendly material, that is not only recyclable after use, but also consists of a core produced from 100% recycled material.

Side panels are made of HPL with a thickness 17,8 mm. KOMPAN HPL has high wearing strength to ensure longevity in all climates.

The steel surfaces are hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
