WOW – a truck! The Truck is a playground hit with all future drivers. With its spacious platforms and dens, it's an experience to explore. Thanks to the side, rear, and front openings that allow children to enter from all sides, the driver's compartment stimulates versatile crawling. This enhances cross-coordination, which is important for the child's

ability to move body sides independently. This also helps to stimulate functions in the brain which are important to future reading skills. The truck's driving compartment has steering wheels and gears and numerous tactile elements. The back of the truck has a black crane hoisting wheel. These elements enhance cause-and-effect understanding when children

play with them. The back is a fine gathering space with a table and sides to sit on. This social space invites children and carers alike.

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use but also consists of a core produced from 100% recycled material.

Foot support is made of HPL with a thickness of 17.8mm, which is very high wearing and also includes unique KOMPAN non-skid surface texture.

The steel surfaces are hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.
