The Stepping Pod, 600 mm appeals to children with the simple play message of The Earth is Lava. Placing more Stepping Pods, in various heights, adds to attraction. It invites jumping or balancing from one to the next. As an individual Stepping Pod, it can function as a sturdy seat and invite a break from play. The Stepping Pod invites less confident balancing acrobats also,

thanks to its sturdy rubber surface. When jumping up on and down from the Stepping Pod, children train their sense of balance. Balance is fundamental in confidently managing the body in its surroundings. This is important for instance when navigating street traffic safely. When jumping down, children additionally builds bone density, as this is a

build up in weight bearing activity on a hard surface.

## Sturdy rubber surface

**Physical:** makes for a skid-resistant surface for jumping up and down, training muscle and motor skills and building bone density.

## Stepping pod

**Physical:** young children learn how to alternate feet and balance. These are important for the proprioceptive and vestibular systems that help children navigate the world securely. Jumping down builds bone density and muscles.
