# Agora Picnic Mini, White

PAR4086

All boards are made of High Pressure Laminate HPL with a .7 in. thickness according to EN 438-6 and has a nonskid surface texture. The multilayer construction makes the boards durable and suited for outdoor use, with a high resistance to impacts, scratches, fire, water and humidity, as well as high UV stability.

The steel surfaces are hot dip galvanized inside and outside with lead free zinc. The galvanization has excellent corrosion resistance in outdoor environments and require low maintenance. Painted steel parts are hot dip galvanized before powder coating.

Powder coated top finish on top of galvanization is processed in two steps: Light grinding and clean sweeping, powder coating - thickness 70-120 µm.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
