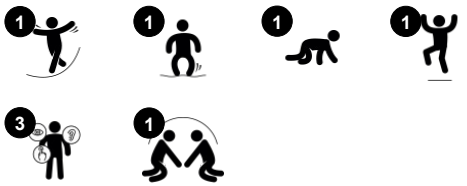
Steep Slope

MSV606

Item no. MSV60600-0201	
General Product Information	
Dimensions LxWxH	120x56x51 cm
Age group	1+
Play capacity (users)	2
Colour options	



The steep slope is a fantastic motivator for play that helps to build strength, balance and coordination for young children. In addition, this challenging structure will help the youngest children assess risk and enrich their cognitive skills in risk assessment and decision-making. The intentional design helps children to feel successful and competent, while also supporting social skills such as turn-taking and decision-making. These skills are important overall health and well-being. Children can gain a wealth of skills through play on the steep slope, as they practice their balance and strengthen their muscles with friends, as they take turns and share in games that help them to enjoy success. The low slope will help to extend playtimes for healthy development and great fun.

Steep Slope

MSV606

Bouncy slope
Physical: sense of balance and space are supported when moving up. Cross coordination can be developed when crawling over. Bone density is strengthened when jumping off.

Handholds
Physical: gripping the handle to pull up your body trains hand-eye coordination and muscles.

Steep Slope

MSV606

Seats of 19mm EcoCore™. EcoCore™ is a highly durable, eco-friendly material, which is not only recyclable after use, but is also made of +95% recycled post-consumer material from e.g., food packing waste in both core and colorful outer layer.

Membranes consist of friction-proof rubberized material of conveyor belt quality with excellent UV resistance. Embedded is a four-layered armouring made of woven polyester. The armouring and the two surface layers result in a total thickness of 9 mm.

Item no. MSV60600-0201		
Installation Information		
Max. fall height		41 cm
Safety surfacing area		12.8 m²
Total installation time		3.5
Excavation volume		0.00 m³
Concrete volume		0.00 m³
Footing depth (standard)		0 cm
Shipment weight		29 kg
Anchoring options	Surface	✔
Warranty Information		
EcoCore HDPE		Lifetime
Membrane		2 years
Spare parts guaranteed		10 years

Sustainability Data

MSV606

Cradle to Gate A1-A3	Total CO_2 emission	CO_2e/kg	Recycled materials
	kg CO_2e	kg CO_2e/kg	%
MSV60600-0201	41.01	1.41	67.52

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

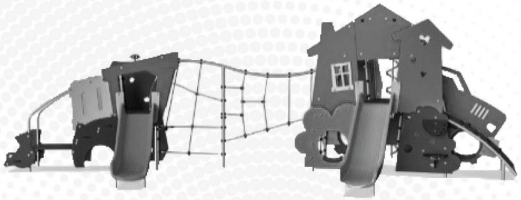
Validation of CO_2 calculation method
BUREAU VERITAS
HSE Denmark A/S

Verification of CO_2 calculation of: Themed play systems



Data version no. 2023-10-05

The CO_2 calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Themed play systems" represented by item no.: MSC641100-3717P.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
