Toddler seat

Physical: balance and spatial awareness.

Good back support and space to ease putting children in the seat and lifting them up, including winter clothing. **Social-Emotional:** eye-height with adult stimulates social contact and emotional bonding. The high sides support the child's seated position. **Cognitive:** swinging movement supports understanding of cause and effect.

Grip bars

Physical: height and diameter to support grips of sizes from toddler to grandparent. **Social-Emotional:** feeling of security when being able to hold onto properly proportioned grip.

Back support

Physical: good, soft back support. **Social-Emotional:** feeling of security and comfort.

Openings for legs

Physical: ease of seating and room for movement. Facilitate lifting the child in and out the seat.

Low, open seat

Physical: adult: possibility to place the toddler in the seat while keeping eye-contact. Older child: training of motor and muscle skills. **Social-Emotional:** security in responding to toddler's moods while swinging.
