This play equipment spur role and construction play. The friendly flowers, clovers and birds support the decorative feeling of an organic factory. The construction play is invited in the blue tubes and the see-through tubes. The toddlers pass items of various sizes and materials through. The side tables with moveable pots offer yet another possibility of

filling and emptying. The unit invites numerous play activities such as peek-a-boo, supported by the many peek-holes and openings. A Play Book text with curriculum supportive games, made by the KOMPAN Play Institute can be ordered.

## Funnel

**Social-Emotional:** trains cooperation and turn-taking as children put materials into the funnel. **Cognitive:** the passing of materials through funnels supports the children's logical thinking and for younger children the understanding of object permanence: that materials don't vanish but run through at the other end.

## See-through tubes

**Social-Emotional:** the paired tubes invite parallel and cooperative play. **Cognitive:** construction play and the understanding of object permanence are supported when shifting items through the see-through tubes.

## String with knobs

**Social-Emotional:** turn-taking and cooperation are supported when pulling the string from side to side with friends or caregiver. **Cognitive:** an understanding of object permanence is supported when the knob disappears and reappears when pulled. **Creative:** leaving the knob in different positions can support symbolic and creative thinking.

## Bubble Window

**Social-Emotional:** invites interaction between outside and inside. **Cognitive:** distorts the sound of the voice, developing logical thinking.

## Bell

**Cognitive:** understanding cause and effect when ringing bell. **Creative:** leaving a mark in creating a sound rhythm when ringing or knocking the bell.

## Pot

**Cognitive:** the pot can be removed, stimulating cause and effect understanding. Filling and emptying the pot stimulates logical thinking and the understanding of concepts such as empty and full. **Creative:** placing the pot in other areas of the play space in creative ways can support symbolic and creative thinking.

## Sand scoops

**Physical:** hand eye coordination and push-pull movements. **Social-Emotional:** invites cooperation due to the two-sidedness and provides for parallel play. **Cognitive:** logical thinking: cause and effect understanding when running scoops in grooves or shifting materials from scoop to scoop. **Creative:** shifting scoops, creating new scoop positions.
