This super play tower will attract children and encourage active physical play. The multiple and varied climbing activities will support children's muscle development as well as their cross-coordination and sense of balance. These skills are important for health and well-being as well as for thinking and learning. For example, using both sides of your body to

climb and navigate the structure stimulates both sides of the brain, essential for learning, particularly for literacy. With so many options for play, children will be supported in physical decision making. Sliding down the slide or gliding down the Fireman's Pole to the ground supports posture and balance, all important skills for young children, and great fun!

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
