The Triple Tower with Bridges is a magnificent play venue for toddlers. It invites physical and social play. The combination of play events ensures hours and days of play, again and again. The varied accesses and the transparency of the structure allow for all to benefit from play, balance, coordination and spatial awareness are the main physical play

thrills: balancing up the inclined bridge is fun, and jumping down to and running over the straight bridge further stimulates the sense of space. Apart from being great fun, this is a fundament for managing the world securely, avoiding falls. The balance of more thrilling and more well-known play activities makes the Triple Tower with bridges a versatile challenge

for younger children. They will meet and turn-take in play, building up social-emotional skills, and friendships.

## Rock climber

**Physical:** supports cross coordination and leg, arm and hand strength. **Social-Emotional:** the inclination makes climbing feel secure, especially for younger children.

## Climb bridge

**Physical:** the skid-preventive cross-bars function as support for toddlers going up and down, supporting spatial awareness.

## Bridge

**Physical:** cross coordination, spatial awareness. **Social-Emotional:** transparency invite cooperation with children on the outside.

## Stair ladder

**Physical:** cross coordination is used, supporting the cooperation of the left and right halves of the brain, which is necessary for reading. For young children, spatial awareness is trained when walking stairs.

## Slide

**Physical:** sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down. **Social-Emotional:** empathy stimulated by turn-taking. **Cognitive:** young children develop their understanding of space, speed and distances when sliding down quickly.
