

The Wizard's Double Tower Fortress ADA

NRO2010

The Wizard's Double Tower Fortress is an irresistible play attraction for children. With its varied play corners and diverse physical play activities it attracts children again and again, for a long time. The stairway with hammock makes a nice haven for children of all abilities. The slides and curly climber are thrilling rides down, training core stability as the child sits

upright when sliding. The variation of inclined wood and net accesses assist the child in climbing up in more or less challenging ways, training cross-coordination and leg, arm and core muscles. An inclined climb gives a bigger sense of security than a vertical one, thus inviting a range of children of varied abilities. The platforms on the ground and at elevated

levels invite meetings and exchanges.
