Despite a compact footprint, the Super Combi 1 offers a lot of exercises for all muscle groups and difficulty levels. The step platforms are excellent for jumping, leg strength, and cardio exercises. The rings can be used for upper body strength exercises, stretching, and fun exercises like "skin the cat". The rope is designed for rope climbing training, with

features that make it accessible to non-athletes as well. There is also a target shoot for fun slam-ball exercises. Finally, we have universal parallel bars that stimulate exercise creativity and can be used directly by wheelchair users.

The snake ladder is made of hot-dip galvanized s235 steel with the following dimensions Ø38 x 4mm. The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

De staanders zijn gemaakt van Ø101,6 x 2 mm, voorverzinkt koolstofstaal en voorzien van een poedercoating, een goede bescherming tegen alle omstandigheden.

The rings are made of molded polycarbonate and TPE to ensure a good grip and soft surface. The rings are rotatable and allows for a large variety of exercises.

The top plate for the jumping platform is made of Ekogrip® panels that consist of a 15 mm polyethylene bottom layer, with a 3 mm top-layer of thermoplastic rubber with a non-skid effect for safe jumping exercises under all-weather circumstances.

The plate for the target is made from 19mm EcoCore™ HDPE that consists of +95% recycled post-consumer material from e.g., food packing waste in both core and colorful outer layer.

The Dip-Station is designed with inclusive in mind, allowing wheelchair users to access the bars at either end. The two bars are placed at two different widths and heights – one narrow and high and one wide and low to allow for training of different individuals and muscle groups.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
