

Octopus Seesaw

M181

Item no. M18110-01P	
General Product Information	
Dimensions LxWxH	31x313x98 cm
Age group	3+
Play capacity (users)	4
Color options	 

The Octopus seesaw helps to motivate children to join in play, so they are rocking together. The cartoonish design attracts children and makes them want to play. The sturdy hand and foot supports allow for mild or wild rocking, depending on the child's energy level. The spring base makes it possible for a range of ages to rock together. The octopus head in the

middle supports an upright seat and holding tight while being rocked. This allows for more socializing and more children. There is room enough for a care giver, too. The seats at the end are big enough for older children as well as adults. The fun thrill of rocking, individually or in pairs or groups, will make children want to play for longer. Rocking on the Octopus seesaw

trains the children's muscles and motor skills, e.g. balance and coordination. The seesaw supports development of social-emotional skills, e.g. cooperation, consideration and turn-taking.

Octopus Seesaw

M181

Theme

Cognitive: suggests a theme and supports dramatic play, which stimulates language and communication skills.

Rocking together

Social-Emotional: the possibility of rocking two together trains cooperation skills. Consideration of others when rocking.

Foot support

Physical: a good footrest supports intensive rocking. Rocking stimulates the senses of balance and space that are fundamental in managing the world securely. To rock intensely also supports coordination and muscle strength.

Rocking spring

Physical: response to movements adds to spatial awareness and sense of balance. These are fundamental motor skills that help the child's ability to sit still on a chair which takes a good sense of balance. **Cognitive:** trains the understanding of cause and effect: when I move my body, the spring responds with movement.

Handhold

Physical: the vertical handgrips ensure a firm grip at different heights, necessary for rocking intensely. This trains hand and arm muscles.

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of material produced from +95% recycled post consumer material from food packing waste.

KOMPAN Springs are made of high quality spring steel according to EN10270. The springs are cleaned by phosphating before they are painted with an epoxy primer and a polyester powder coating as top finish. The springs are fixed by unique anti pinch fittings for maximum safety and long lifetime.

The springs are fixed by unique anti pinch fittings for maximum safety and long lifetime.

Item no. M18110-01P	
Installation Information	
Max. fall height	100 cm
Safety surfacing area	13.7 m²
Total installation time	4.9 hours
Excavation volume	0.42 m³
Concrete volume	0.00 m³
Footing depth (standard)	42 cm
Shipment weight	186 kg
Anchoring options	In-ground ✓ Surface ✓
Warranty Information	
EcoCore HDPE	Lifetime
Hot dip galvanised steel	Lifetime
HPL platform	15 years
Spare parts guaranteed	10 years
Springs	5 years

Handholds and footrests are made of injection moulded high quality nylon (PA6). PA6 has good wearing and impact strength.

The steel support posts are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with lowest possible CO2e emission factor such as EcoCore™ panels of +95% post consumer recycled ocean waste.

Sustainability Data

M181

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
M18110-01P	326.05	2.47	49.67

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Freestanding play equipment

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: GXY916012-3417.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 30. October 2023 | Valid until: 30. October 2025

Verified by:

Julie Marie Vejsgaard Larsen, LCA & EPD Consultant

Verification based on report: Validation of CO₂ calculation of 9 categories of Kompan product line, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Julie M. V. Larsen.
