색상 옵션	

The enclosed Outdoor PlayBox offers fun and varied play meandering across levels and platforms, as well as both motor skill and muscle training, and in addition social and cognitive play benefits. The circular opening invites children into the ground level of the structure, which offers a fast climb up to the elevated level slide as well as two more

secluded play areas with either an explorative play panel or a TicTacToe, which can be played with participants outside the PlayBox also. Children who climb straight up to the wild slide via climbing walls, also get the offering of entering through soft flap doors into a different and very tactile play experience with the horizontal rollers. For those who slide

down, the downwards and sideways slide leads them to the outside of the playbox, ready to climb in for the next loop of play. All in all there is plenty of physical exercise and fun togetherness.

Our panels are made from HPL or PC, offering excellent resistance to vandalism and wear. With high UV protection for outdoor use, they retain their appearance and play value over time.

Children should be free to play without restraints; safety remains our top priority. All soft play elements are designed to meet the highest global standards and regulations for materials.

Blow molded decks in PP material with non-skid surface texture, climbing handholds and multiple attachment options for play activities.

설치 정보	
최대 낙하 높이	100 cm
안전 바닥 면적	0.0 m ²
총 설치 시간	57.2 시간
굴착량	0.00 m ³
콘크리트 사용량	0.00 m ³
기초 깊이 (표준)	0 cm
운송 중량	802 kg
고정 방식 옵션	Surface ✓
보증 정보	
PP 데크	10 년
로프 및 네트	10 년
HPL Panels	5 년
Soft Activities	5 년
보증 대상 예비 부품	10 년

Our slides are made from durable polyethylene. Thanks to our expertise in rotational molding, they are designed to be both safe and enjoyable, delivering a smooth, fast ride for all ages.

Pre-galvanized steel tubes with a powder-coated finish ensure exceptional lifetime and low maintenance over time.

UV-stabilized PES polyester rope with EcoYarn™ of 95% post consumer recycled material.

Independent review certificate

Kompan A/S
C. F. Tietgens Blvd. 32C, 5220 Odense SØ

Bureau Veritas hereby attests that the CO₂e-calculations (covering materials, processing, waste and transport) done by Kompan for "Play Systems", meet the requirements set by the listed standard.

Kompan A/S uses a selection of EPDs and emission factors from the Life Cycle Assessment database Ecoinvent 3.11. These values are reported as kg CO₂e, with all other impact categories excluded in line with the scope of ISO 14067:2018. The emission factors cover, material use, manufacturing processes, transport to Kompan, and electricity used during manufacturing. The presented emissions fall under GHG Protocol scope 3 emissions. Scope 1 and 2 are not presented. Scope 3 emissions include emission sources in the upstream value chain of a company, downstream emissions are excluded in this analysis.

Method: ISO 14067:2018 using GHG protocol guidance documents, reported as kg CO₂e.

Object

The verification has been done on the one pager "PCM310921-0905" version: 27-10-2025. The supporting documentation "KOMPAN data_updated emissions factors_2025_V2" and "Emissions factors, EPD's and ecoinvent 3.11_2025" was also reviewed and approved.

Declaration

The verification has been completed as a critical review with a limited assurance. I hereby confirm that nothing has come to the reviewer's attention which would lead to conclude that the study does not give an accurate depiction or isn't completed following method of the CO₂e calculation, the requirements of ISO 14067:2018, and 14071:2024, in the above referenced documentation.

Note: This verification only covers calculation elements according to method described in ISO 14067:2018 and may not be seen as a Life Cycle Assessment according to ISO 14067:2018.
