The Movable Hammocks take the prize as the most fun and interesting meeting point on ground level: The two hammocks can be run from side to side, placing them closer together or further apart. This creates an adjustable, swaying platform for socialising. Young people are extremely attracted to items that respond to movement, and the hammocks, rail, and seating combinations support fun body positions: Children can be seated, lying, standing, or kneeling when relaxing together. This makes the Movable Hammocks relevant to most ages and users, including users with disabilities. The movability of the hammocks invites cooperation and taking turns skills. The gentle, swaying feel when lying in the hammock adds body pressure, known to calm down anxious children. Pleasant furniture for playful meetings.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
