The Double Tower with Spider Net is a fantastic and versatile play piece that children will want to try again and again. The spider net has partly inclined horizontal rungs, which adds challenge to the climb. It is a fine meeting point, inviting children to cooperate and take turns, stimulating their social-emotional development. Climbing trains the cross-

coordination, which again trains cross-modal perception, necessary for reading. The tower is a great destination for all, taking children via accessible stairs to the options of a slide or a rotating movement down on the Curly Climber. The Curly Climber stimulates the proprioception and sense of space and balance. On ground level a somersault bar

provides horizontal rotation, training the sense of space.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
