Vertical posts, swing frames end connectors and crossbeams can either be hot-dip galvanised steel or powder-coated on a pre-galvanised steel base. S

The swing hangers are made of high-quality UV-stabilised nylon (PA6) housing with integrated lifetime sealed ball bearings. The adjustable chains are fixed by a stainless steel hook with a theft-proof snake-eye bolt which is manufactured within an anti-twist house. All seats are fixed with two chains and are available with either standard or anti-wrap suspension.

The steel surfaces are hot-dip galvanised inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
