

Playhouse with Balcony

PCM003532

This activity-packed playhouse will captivate and excite toddlers again and again, offering features that enhance play value and support their understanding of the world. The house's scale provides the perfect frame for looping the entrance and crawl-through hole, promoting cross-coordination. The shop counter desk features a conveyor belt made of small

spheres, providing a great tactile experience that supports cross-modal perception – an important for skill for early reading. Additionally, the sand tube panel and the peek-a-boo panel intrigue toddlers and stimulate their understanding of object permanence: that items may still exist even though out of sight. These thoughtfully designed features work

together to create a play environment that supports essential developmental milestones while providing endless fun and discovery for toddlers.

Item no.	
General Product Information	
Dimensions LxWxH	7'7"x5'9"x6'1"
Age group	6m - 5
Play capacity (users)	15
Color options	

Playhouse with Balcony

PCM003532

Window with curtains

Physical: tactile stimulation supports sensory skills, when children explore characteristics of the materials. **Social-Emotional:** social interaction between inside and outside, supporting taking turns and cooperation skills. **Cognitive:** understanding object permanence when playing, e.g. peek-a-boo. Dramatic play support, encouraging language skills. **Creative:** leaving a mark, deciding how to place curtains.

Crawl-through hole

Physical: the hole allows for climbing and crawling through, developing cross coordination, proprioception and spatial awareness. **Social-Emotional:** cooperation and turn-taking when passing one another.

Desk with conveyor belt

Physical: tactile stimulation from running hands over rolling spheres on conveyor belt. **Social-Emotional:** sharing and cooperation from both sides create a social scenario that supports communication and cooperation. **Cognitive:** supports dramatic play scenarios, trains cause and effect understanding.

Balcony

Social-Emotional: the balcony invites meetings and interaction with people on ground level. **Cognitive:** invites dramatic play and performance, which stimulates language development.

Desk

Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

Sustainability Data

PCM003532

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Verification of CO₂ calculation of: Play systems

Data version no. 2023-10-05

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200321-0950.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
